Mierge (Xiamen) Trading Co. Ltd.

COMPANY PROFILE

Boardsfrim was established in 2024, is a specialized foreign trade import-export company. Our manufacturing partner has over 10 years of experience in the skateboard and fingerboard industry. Boardsfirm offers fingerboards at wholesale prices, and all of our products are made exclusively from high-quality Northeast maple or Canadian maple.

We are committed to providing high-quality fingerboard, skateboards and strive to ensure 100% customer satisfaction. Our minimum order quantity for bulk fingerboards is 100 sets. We offer customization options for the wheel colors, deck designs, and packaging. To date, we have served more than 100 clients.

We are looking forward to forming successful business relationships with new clients around the world in the near future.

3108 Color-popsicle deck

■ Stained plate series

Double-warping skateboard is a kind of flexible skateboard, which is specially used for technical action. It divides the head and tail of the skateboard. Generally, in order to maintain its elasticity and stability, seven layers of plates are the main materials, such as North-east Maple, Russian Maple, Canadian Maple, glass fiber and so on.

Type:JS 31JF 1

Type:JS 31JF 2

Type:Color mixing

Type:Laser

Type:Gold and silver foil

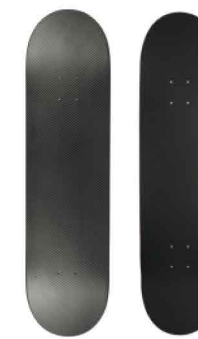

Type:Stain

Type:Thermal transfer

Type:Carbon fiber

Small Fishboard Plate

Big Fishboard is a kind of large-sized skateboard, which is mainly made of bamboo, Canadian maple, Russian maple, Northeast maple and glass fiber. Its stability and balance are excellent.

Small fish board is one of the most mini skateboards in skateboarding sports equipment. Its standard size is 64cm*16.5cm. Because of its small size, it is more suitable for children and girls to start learning skateboards. Because of its small area, it is easier to force control skateboards.

Model: JSH-601

Longboard Deck

The deck of an electric board often requires the integration of various materials to precisely meet the performance requirements in different scenarios. Common basic materials include Russian birch, North American maple, and bamboo; high-strength composite materials such as glass fiber (GF) and carbon fiber (CF) are also frequently considered. In actual production, based on the specific requirements for elasticity, strength, size specifications, etc., the optimal balance of performance is achieved through the scientific proportioning and composite processing of different materials, thus catering to diverse usage needs.

Model: JSH-602

Electric Deck

We have more than 30 longboard molds, which can be used to create more than 100 different styles of longboards, including deep dive, medium dive, double kick, single kick ,full flat, straight concave, reverse flat straight concave, W-shape, and models with foot cavities, covering various dimensions such as length, width, depth, and curvature to meet diverse needs....

PC Transparent Skateboard

Transparent Skateboard

Dimension:	31.5"X10"
Shape:	double kick
Deck:	acrylic material
Truck:	6.25"
Wheel:	65mm PU casting Bearing:ABEC-7 chrom
top :	Water transfer graphic
	LED light with Wheels

Popsicle Skateboard

Model:JS-31CS-1

Deck Size: 31"*8"
Deck material: russian maple
Wheel: 52mm*32mm PU
Truck: T5-MS

Model:JS-31CS-2

Deck Size: 31"*8"
Deck material: russian maple
Wheel: 52mm*32mm PU
Truck: T5-MS

Type:JS-31CS-3

Type:JS-31CS-4

Popsicle Skateboard

Model:JS-31HGD-1

Deck Size: 31"*8"
Deck material: russian maple
Wheel: 52mm*32mm PU
Truck: T5-MS

Type:JS-31HGD-2

Type:JS-31HGD-3

Popsicle Skateboard

CONSTELLATION SKATEBOARD

A set of 12 styles

Interpret the significance of constellations and convey their energy

Cool Flash

Model:JS-31TH-1

Deck Size: 31"*8"

Deck material: russian maple

Wheel: 60mm*45mm PU

Truck: T5-MS

Type:JS-31TH-2

Type:JS-31TH-3

Surf Skateboard

COOL BOARD

Model:JS-LC-1

Deck Size: 31"*9.75"
Deck material: russian maple
Wheel: 65mm*51mm PU
Truck: T5-MS

Type:JS-31LC-3

Model:JS-31LC-2

Deck Size: 31"*9.75"
Deck material: russian maple
Wheel: 65mm*51mm PU
Truck: T5-MS

Type:JS-31LC-4

Modhi

Model:JS-MD-1

Deck Size: 31"*9.75"
Deck material: russian maple
Wheel: 65mm*51mm PU
Truck: T5-MS

Model:JS-31MD-2

Deck Size: 31"*9.75"
Deck material: russian maple
Wheel: 65mm*51mm PU
Truck: T5-MS

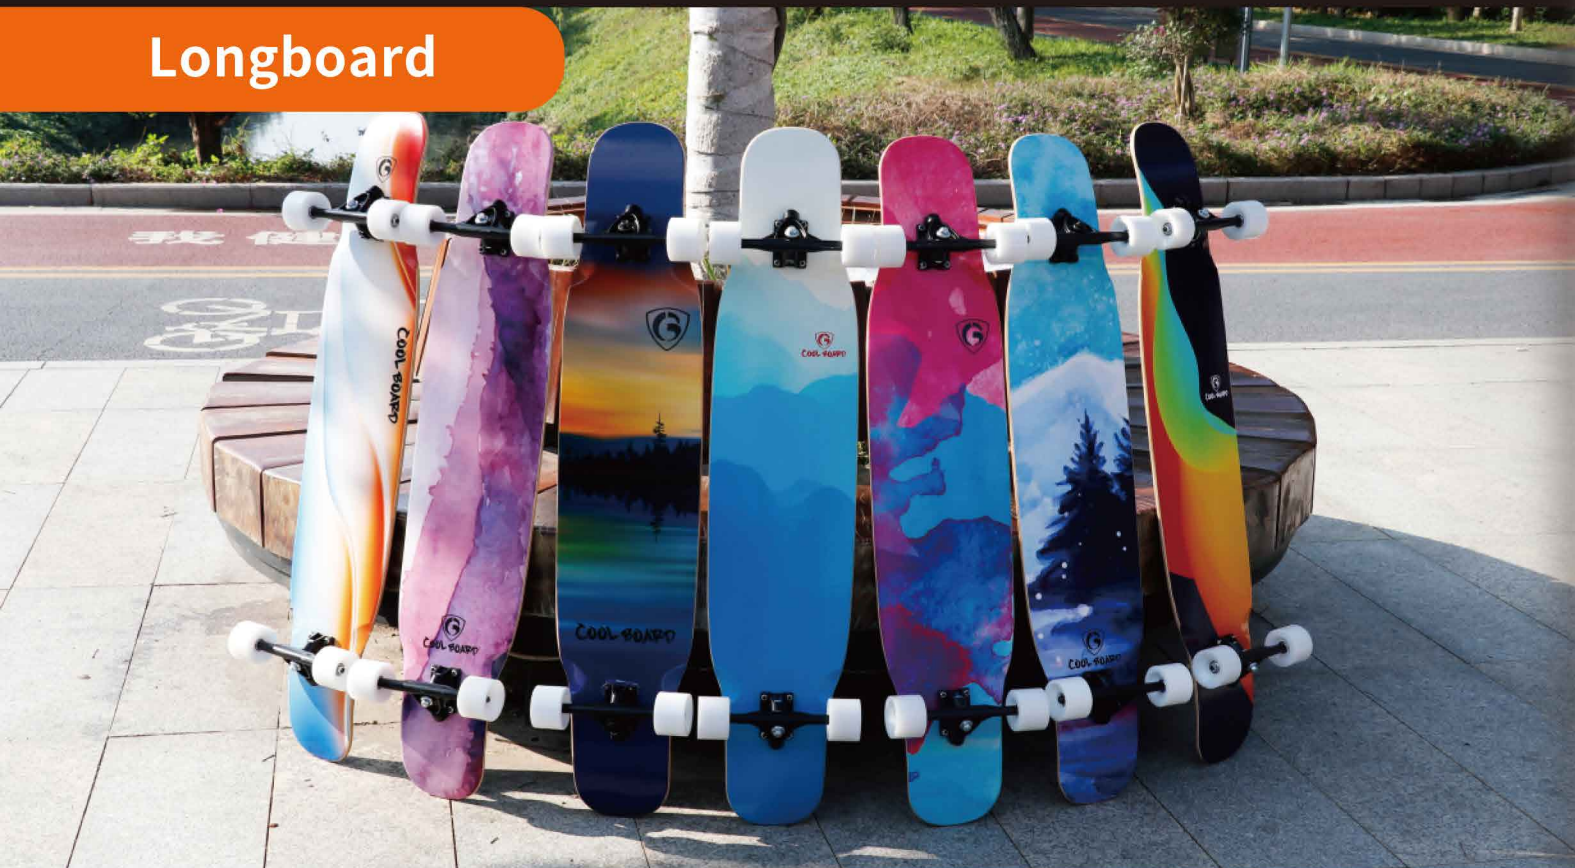

Type:JS-31MD-3

Type:JS-31MD-4

Longboard

Model:JS-CB-1

Deck Size: 39.5"*9.8"
Deck material: Full Canadian maple
Deck Layer: 7 plies
Wheel: 70mm PUC
Bracket-base: 7" SQ longboard
 alloy truck
Bearing: ABEC-9

Model:JS-CB-2

Deck Size: 46"*9.75"
Deck material: Full Canadian maple
Deck Layer: 7 plies
Wheel: 70mm PUC
Bracket-base: 7" SQ longboard
 alloy truck
Bearing: ABEC-9

Electric Longboard

Customized aluminum alloy bridge frame for electric sliding
Durable and sturdy, faster and more stable

Model:JS-HD-1

Product Features

Compact and lightweight to carry, suitable for short-distance travel. Simple and easy to use. At modest price. A good choice for stores shipping from overseas warehouse due to low cost of ocean freight and storage.

Model:JS-HD-2

Product Features

Longboard with split boxes, equipped with 90mm wheels (changable tire), replaceable batteries (with multiple packs of spare batteries), featuring long range, dual-drive enabling high performance, a powerful gear for climbing and highly cost-effective.

Type:JS-HD-3

Type:JS-HD-4

Finger skateboarding

Model:JS-FZ-1

Deck Size: 99*29mm

Canadian maple sheet - UV printed pattern - PU pad anti-slip fabric - PU wheel belt bearing wheel

Model:JS-FZ-2

Deck Size: 99*32

Acrylic transparent sheet - UV printed pattern - Alloy bracket - PU wheel belt bearing wheel

Dye Plate

Plate size can be customized: 2.8/ 2.9/3.0/ 3.2/3.4/ 3.5(cm)

Plastic board

Plastic small fishboard

Small fishboard is one of the most mini skateboards in skateboarding equipment. Because of its small size, it is more suitable for children and girls to learn how to start skateboarding. Because of its small area, it is easier to control skateboards by force.

Model:JS-P001

Deck Size: 22.5"*6"
Deck material: High impact PP deck
Deck Layer:
Wheel: 60mm*45mm PUC
Bracket-base: 3.25" strong alloy truck
Bearing: ABEC-7

Colour stitching series

Model:JS-P002

Deck Size: 22.5"*6"
Deck material: High impact PP deck
Deck Layer:
Wheel: 60mm*45mm PUC
Bracket-base: 3.25" strong alloy truck
Bearing: ABEC-7

Type:JS-P103

Type:PP2201

Type:PC2202W

Type:PC2203W

Balance Plates

Everything in the world needs balance

P I N G H E N G

Fitnes BalanceBoard

Material: 15mm Russian deck with stoper

Dimension: 29"*11"

Anti surface: spray grip tape can be customizec

Roller: cork / solfwood 010x

L:45~60mm can be customized

Wooden Swing set

Shape: Double kick with concave

Material of Top: Canadian maple

Other layer:

Northeast wood thinckness: 11mm

Swing Balance Board

Arc Length: 93cm/106cm

Straight Line Lenght: 83cm/93cm

Width/height: 30cm*17.8cm/31cm*23cm

Thickness: 1.5cm

Weight: 3Kg/3.6Kg

Skateboard perimeter

Model:JS-HW-1

Deck Size: 95*27*27~56cm
Deck material: russian maple

Skateboard Chairs

Model:JS-P002

Deck Size: 22.5"*6"

Deck material: High impact PP deck

Deck Layer:

Wheel: 60mm*45mm PUC

Bracket-base: 3.25" strong alloy truck

Bearing: ABEC-7

Wood category

Deck Size: 30"*14.6"
Deck material: russian maple

Colour stitching series

Model:JS-P002

Deck Size: 22.5"*6"

Deck material: High impact PP deck

Deck Layer:

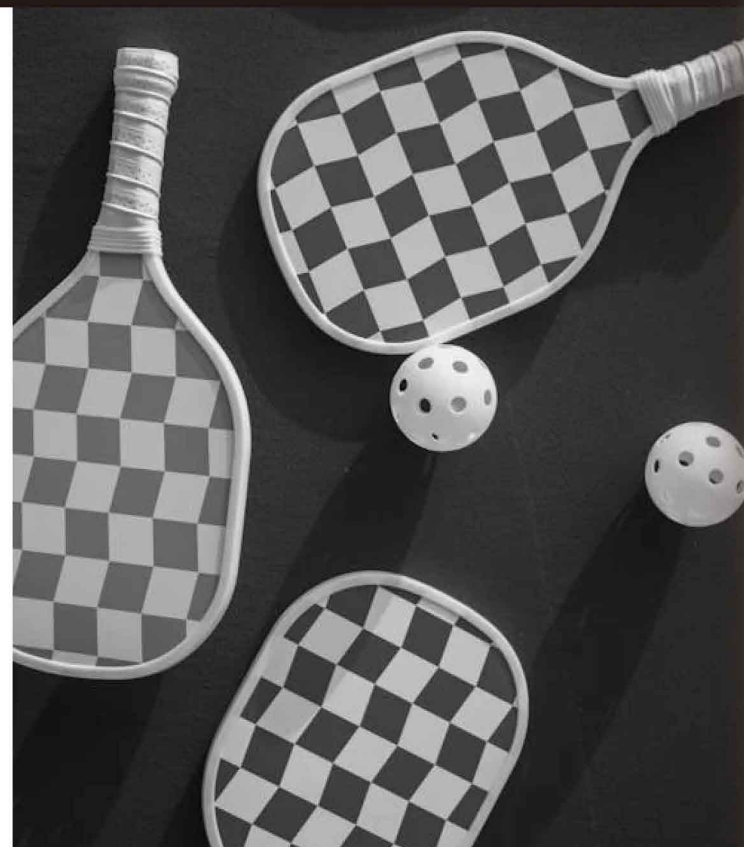

Wheel: 60mm*45mm PUC

Bracket-base: 3.25" strong alloy truck

Bearing: ABEC-7

Pickleball Paddle

Model:JS-PEAKrocket

Carbon fiber is a new type of fiber material with high strength and high modulus fiber content of more than 95%. It has the characteristics of "soft on the outside and rigid on the inside", the shell is hard and the softness of textile fibers, the quality is lighter than that of metal aluminum, but the strength is higher than that of steel, and it has the characteristics of corrosion resistance and high modulus, which is often called "new material" and also has the reputation of "black gold", which is a new generation of reinforced fiber.

Polypropylene honeycomb

PP honeycomb panel is composed of polypropylene honeycomb core and glass fiber reinforced polypropylene epidermis thermal fusion, is a composite board with light weight and high strength, the sandwich of PP honeycomb panel is polypropylene honeycomb core, which has the advantages of chemical resistance, heat resistance, high strength, light weight, insulation, etc., with strong glass fiber reinforced skin material can provide high stiffness and excellent impact resistance, the honeycomb core and the panel are connected by hot melt connection process, without glue, which makes the PP honeycomb panel more lightweight and environmentally friendly. Moreover, the skin is almost not layered, and in many application scenarios, it can replace traditional materials such as bamboo and wood plywood, iron plate, and glass fiber reinforced plastic plate.
